1. INTRODUCTION

The curriculum of an undergraduate university study programme Criminalistics and security management is the result of the regular review process, which began with the Decision of the Senate at the session held on 26 February 2022 (No. 01-993-1 / 22). The regular revision procedure was carried out according to the *Rulebook on the procedure of adopting new and revisions of existing study programmes* (No. 01-993-1 / 22). It stipulates that the Committee coordinates a revised curriculum. The Committee also includes student representatives and external users, and the scientific-teaching/artistic-teaching council of the organizational unit submits their proposal to the University Senate for adoption.

In order to involve all stakeholders in the process of improving the study programme, a public hearing was held on April 5, 2023, in Hall Nr. II at the Faculty of Law of the University of Mostar. The invitation to the public hearing was announced in a timely manner on the website of the Faculty of Law. Before the public hearing, on March 20th, a working meeting of the teaching staff of the Faculty of Law was held. The audit committee considered the suggestions and proposals presented at the meeting, and based on them, created a study programmes proposal that was discussed at the public hearing. The public hearing was held in accordance with the provisions of the Ordinance on the procedure for adopting new and revising existing study programs at the University of Mostar. In addition to the members of the Commission, professors, assistants, students, University employees, representatives of business and administration, judges and lawyers were present at the public debate. The president of the Study Program Revision Committee presented the basic features of the revised curriculum, after which the discussion began. In the framework of the public hearing, it was suggested to introduce courses related to the study of new phenomena in the phenomenology of criminality, especially through developed techniques and technology such as cybercrime and other forms of committing criminal acts in the digital space. The conclusions of the public discussion were taken into account when creating the curriculum and incorporated in the form of compulsory or optional subjects.

The conclusions of the public debate were taken into account during the development of the curriculum.

In addition to the conclusions of the public debate, the recommendations of the Expert Committee from the last institutional accreditation in 2020 were taken into account. The recommendations include practical work outside the University (where applicable), application of legal and internal acts on the minimum share of pre-examination obligations in the final grade of all courses, and the application of modern teaching methods with the student at the centre of the teaching process.

Also, during the development of the curriculum, all strategic tasks in the strategic area of education from the *University Development Strategy 2018 – 2023*, which relate to the curriculum and teaching process, were carried out (more in the chapter "3.1. Link to the University Development Strategy").

In addition, when making decisions on the type of changes, all relevant statistical data and survey results collected and conducted in the period since the last revision/adoption of the study programme were analysed:

- regular student surveys at the level of the academic year
- survey on students' pass rate and success in the exam
- compatibility with the needs of the labor market

The new study programme is based on new learning outcomes and competencies that students acquire, which are listed at the level of the study program and each course separately.

Taking into account all the above, the following changes have been made in this revised curriculum in comparison to the existing one:

- courses were introduced that were suggested by experts from practice, who were pointed out during the Public hearing during the introduction of the undergraduate university study programme Criminalistics and Security Management
- a form of practice was introduced as a special course in undergraduate studies
- in addition to lectures and exercises in the performance part, the participation of experts from practice is foreseen.

2. GENERAL INFORMATION ABOUT THE STUDY PROGRAMME

Study programme:	Criminalistics and Security Management
Cycle:	1st (undergraduate)
Type:	University study programme
Scientific area:	Social Sciences
Scientific field:	Law; Criminalistics
Academic title:	Bachelor of Criminalistics and Security Management
EQF qualification level:	6
Duration of the study programme:	3 years, 6 semester
ECTS:	180
Language:	Croatian
Mode of study:	Full-time, part-time
Awarding institution:	University of Mostar
Institution administering study programme:	University of Mostar, Faculty of Law
Study programme objectives:	<ul style="list-style-type: none"> - train students for independent application of legal regulations - achieve the student's understanding of the basic principles of the criminal profession - train the student to independently carry out operational actions - achieve the student's ability to understand national, international and regional security systems; - train the student to plan and implement the necessary measures and actions in order to detect and prosecute the perpetrator
Study programme competencies:	<p>After completing the studies, students will acquire the knowledge of a criminalist and security manager. knowledge and skills that enable them to independently perform tasks related to security, detection, resolution of criminal offenses and planning for the prevention and suppression of crime. These are, first of all, operational knowledge about the criminal act, the perpetrator, the victim, the circumstances of the appearance of criminal acts and security problems in contact with extra-legal areas that are necessary in modern criminology and security management. Upon completion of the three-year study, the student will be trained to continue a further two-year study, for additional specialist education that would prepare him for research in narrower areas, but also for communication at the level of European and international criminal justice and police cooperation.</p>
Study programme learning outcomes:	<p>1. IU-KB- 1- apply operational knowledge about the criminal act, the perpetrator, the victim, the circumstances of the appearance of criminal acts and security problems in contact with extra-legal areas that are necessary in modern criminology and security management.</p>

	<p>2. IU-KB-2 to apply legal regulations relevant to the field of crime and security</p> <p>3. IU-KB-3 - plan the implementation of necessary measures and actions aimed at detecting and prosecuting the perpetrator;</p> <p>4. IU-KB-4- Apply acquired knowledge related to facts and evidence in criminal proceedings</p> <p>5. IU-KB-5 - implement planned measures and actions aimed at detecting and prosecuting perpetrators;</p> <p>6. IU-KB-6 - apply the provisions of substantive and procedural criminal law;</p> <p>7. IU-KB-7 - create and use criminal records in order to suppress crime;</p> <p>8. IU-KB-8 - to know national, international, regional security systems;</p> <p>9. IU-KB-9- implement security theories and systems, intelligence systems;</p> <p>10. IU-KB-10 - be able to apply dactyloscopic identification methods and identification methods using DNA analysis;</p> <p>11. IU-KB-11 - develop private security models;</p> <p>12. IU-KB-12 - resolve crisis situations;</p> <p>13. IU-KB-13 - collect, process, sort, analyze data in IT systems;</p> <p>14. IU-KB-14 - manage human resources within the relevant institution or institution;</p> <p>15. IU-KB-15 - propose and make strategic decisions,</p> <p>16. IU-KB-16 - assume ethical and social responsibility for the execution of entrusted tasks</p> <p>17. IU-KB-17 - critically judge and self-evaluate the performance of entrusted tasks</p> <p>18. IU-KB-18- Application of German / English knowledge in speaking, writing and understanding in accordance with the European Framework of Reference for Languages (ZEROJ).</p>
<p>Opportunities after graduation:</p>	<p>There are many employment opportunities for students after completing their studies, both in the state and in the private sector. First of all, these are all state bodies that deal with criminal investigations and security problems. These are the Ministry of Interior at all levels, SIPA, OSA, Border Police, detective and security companies. Students are trained to research a criminal offense and its perpetrator, obtain evidence, analyze and synthesize it, as well as state, dynamics and trends of modern crime and security, while monitoring all reforms of criminal legislation, both material and procedural.</p>
<p>Accreditation:</p>	<p>The University of Mostar received a Decision on Institutional Reaccreditation on 14 January 2020 from the competent Ministry of Education, Science, Culture and Sports of the HNŽ on the recommendation of the Agency for Development of Higher Education and Quality Assurance of BiH, after which the University was registered in the State Register of Accredited Higher Education Institutions.</p>

3. BASIC CHARACTERISTICS OF THE STUDY PROGRAMME

3.1. Connection with the Development strategy of the University of Mostar

In the *Development Strategy of the University of Mostar 2018 - 2023* in the strategic field of education, several strategic goals are related to the curriculum and its elements.

Objective 1 defines that the University, in cooperation with stakeholders, will develop, approve, implement and continuously monitor and improve study programmes at all levels. The following tasks arise from clearly defined learning outcomes related to labour market needs, following the European Qualifications Framework (EQF):

- Task 1: clearly define the objectives and anticipated learning outcomes of each study programme and harmonize the content of the study programme with them, following the appropriate level of the European Qualifications Framework and the qualification standard
- Task 2: Introduce a transparent and consistent process of revision and improvement of study programmes with the participation of students and other stakeholders
- Task 5: ensure realistic allocation of ECTS credits, through a defined system of ECTS coordination at all study levels
- Task 6: improve the interdisciplinarity of all study programmes by enabling elective courses at the university level.

Objective 3 refers to the development of a wide network of teaching bases, including organizations from different fields of activity, to establish cooperation that will enable the connection of practice, science, art, and higher education. The following tasks arise from it:

- Task 2: increase the number of hours and the share of teaching practice in the study programmes and the share of ECTS credits acquired by it
- Task 3: increase the number of bachelor/master papers related to the topic and content.

In the coming period, the faculty will monitor the implementation of the strategy through the creation and adoption of documents such as the Strategy Implementation Action Plan and the implementation of the action plan

3.2. Compliance with the achievements of a certain scientific/artistic area and labour market and connection with the standards of occupations/qualifications

Objectives, competencies, and learning outcomes at the level of the study programme are defined in a way that is in line with the achievements of a particular scientific/artistic area and labour market and related to the standards of occupations/qualifications.

To harmonize with the achievements of the scientific/artistic area, the representatives of teachers in the Committee for the development of the revised curriculum and other teachers who participated in the development of syllabi for each course took into account current achievements and trends in scientific area, field, branches (indicate for each study programme), relating to into account contemporary achievements and trends in the scientific field of social sciences, the field of criminalistics and law, and for the profession important branches such as criminal law, criminal procedural law, criminology, security, which relate to the acquisition of knowledge and competences necessary for the academic degree level of a bachelor's degree in Criminalistics and Security Management. Also, student representatives and external users were appointed to the Committee for the development of the revised curriculum to harmonize with the labour market. Public hearing was organized with the participation of

experts from practice and economics especially for the profession of important representatives from the Ministry of Internal Affairs, the State Agency for Investigation and Protection, the legal profession, whose suggestions were taken into account when creating the curriculum., and their suggestions were taken into account in the development of the curriculum.

Since no occupational standard or qualification standard has been defined at any level in BiH, the following documents have been taken into account:

- Decision on the standard classification of occupations in the FBiH (Official Gazette of the FBiH, Vol. XI, No. 40, No. 8, 2004), which lists occupations under the category "Gender 2. Experts and Scientists" Gender 3. Technicians and other professional occupations, Gender 5. Service and commercial occupations lists occupations whose jobs include:

2470 STATE ADMINISTRATION EXPERTS

2470.06 Criminal technical expert

2470.07 Police inspector

345 POLICE INSPECTORS AND DETECTIVES

3450 POLICE INSPECTORS AND DETECTIVES

3450.01 Detective

3450.02 Manager of insurance operations

3450.03 Crime technician

3450.04 Criminal inspector

3450.05 Police officer for special tasks

5162 POLICE OFFICERS

5162.01 Police officer

5162.02 Policeman

5162.03 Traffic policeman

5162.04 Border policeman

5162.05 Special police officer

5162.06 Police detective

5162.07 Police officer

Police inspectors and detectives investigate committed crimes and try to get information about people and institutions that can help prevent crime. These tasks usually include: investigation of facts and circumstances related to the committed criminal offense in order to discover the perpetrator; collection of information about persons and institutions, usually with the aim of preventing inadmissible behavior; investigating suspicious behavior; apprehension by order or within jurisdiction; guarding persons deprived of liberty and testifying in court. These jobs may include supervising co-workers. Also, police officers maintain order and ensure compliance with the provisions of laws and regulations, and when necessary, ensure their application with the use of force. These jobs include: a) maintaining order by applying the provisions of laws and regulations; b) protection of persons and property from dangers and illegal actions; c) regulating traffic and assuming authority in the event of traffic accidents; d) visiting the state (land and water) border in order to stop persons illegally entering or leaving the country and preventing the illegal import or export of goods and currency; e) checking of travel documents of persons at border crossings; f) arresting persons for violating the law.

Jobs/competencies/learning outcomes from all the above documents are implemented in the competencies and learning outcomes at the level of the study programme listed in chapter "2. General information about the study programme". They are realised in core courses, in order to ensure that all students achieve them with the acquired qualification. The coverage of these learning outcomes at the

level of the study programme with the learning outcomes at the level of core courses is presented in the chapter “3.12. Matrix of learning outcomes”.

3.3. Comparability with the study programmes in the country and abroad

The undergraduate study programme Criminalistics and Security Management is completely complementary to existing study programs in Bosnia and Herzegovina, the Republic of Croatia and other European countries. The name of the study program and the content of the study plan and program are unique in the territory of Bosnia and Herzegovina. The curriculum and study concept can be compared with:

- study programs in Bosnia and Herzegovina: Faculty of Criminology, Criminology and Security Studies at the University of Sarajevo, Criminology and Security Studies at the University of Džemal Bijedić in Mostar

- study programs abroad: University Department of Forensic Sciences, University of Split;

Comparability is reflected exclusively in the competencies and learning outcomes at the level of study programmes and in the duration of studies, while the study programme retains its specifics mainly through the structure, course names, and ECTS credits.

3.4. Openness to student mobility

Student mobility is defined by the *Rulebook on international mobility*, which refers to administrative support for students, student mobility documents, insurance, method of application, the procedure for recognizing mobility and information package. The unique recognition methodology is defined at the university level by the Senate Decision on the adoption of a single form for the *Decision on recognition of courses, ECTS credits, grades, and professional practice during student mobility*, which is recorded in the diploma supplement. Students can find information about mobility programs and accompanying forms on the University's website, and through the Vice Dean for Science, Development and International Cooperation as well as the coordinator for international cooperation at the Faculty of Law, who forwards information from the university's Office for International Cooperation to student representatives.

3.5. Conditions for enrolment in the study programme and transfer from other study programmes

The *Rulebook on study of the University of Mostar* and the Decision on the conditions of studying at the Faculty of Law define the right to enrol in undergraduate, graduate, and integrated study programmes, which is done through a public competition. The Senate, at the proposal of the scientific-teaching / artistic-teaching council of the organizational unit, and with the consent of the Governing Board of the University and the competent Ministry of Education, Science, Culture and Sports of HNŽ, announces a public tender. It is published on the website and bulletin board (Faculty of Law), which contains information on the conditions for enrolment, entrance examination, tuition fees, criteria for selecting candidates, and other information.

When transferring from other study programs, a request is submitted to the dean of the Faculty of Law. The dean makes a decision on the recognition of the exam based on the opinion of the appropriate committee.

3.6. Conditions for enrolment in the next semester and year of study and graduation

Conditions for enrolment in the next semester and higher year of study are defined by the *Rulebook on study* of the University of Mostar and the Decision on the conditions of studying at the Faculty of Law. The study program ends with the passing of all exams of the third year of study and the acquisition of a total of 180 ECTS points.

3.7. Organization of study programme

The study programme is organized through two semesters in the academic year, and classes are conducted according to the schedule of classes through weeks/shifts.

The amount and type of classes that part-time students are required to attend, as well as the alternative workload for the part of classes that are not required to be attended, are defined by the curriculum of each subject. Also, the curriculum of each subject defines the maximum number of hours of online teaching according to the type of teaching, which is determined every academic year. Professional practice is organized in the following way: organizing practical workshops in the premises of the faculty, i.e. in an equipped forensic cabinet or on the university campus.

3.8. Structure of the study programme

The structure of the study programme is reflected in the number of hours of each type of teaching and teaching in total, the number of hours of practice, and the number of hours of independent student work in the total student workload of 180 ECTS credits, or $180 \times 30 = 5400$ hours of work.

According to the *Rulebook on the procedure for adopting new and revisions of existing study programmes* (No. 01-993-1/22), only core courses are listed in the curriculum, while electives are adopted in the annual curriculum for each academic year. Therefore, the table will show the number of hours of each type of teaching and teaching in total, the number of hours of practice, and the number of hours of independent work only in core courses.

In relation to the total number of ECTS credits, a sum of ECTS credits acquired in elective courses is 9, and the student can choose a total of 3 elective courses.

Besides core and elective courses at the level of the study programme and at the level of organizational unit, i.e., in addition to 30 ECTS credits per semester, a student can choose university elective courses from the list adopted by the Senate each academic year, which are recorded in diploma supplement.

The purpose of elective courses at the study programme level is a more detailed elaboration of learning outcomes already acquired in core courses but following student preferences. The purpose of university elective courses is to acquire competencies not provided by the study programme, but that can help students achieve competitiveness in the market and contribute to building one's personality through education.

Structure of the study programme including certain types of teaching, practice and independent work:

Year of study: I.

3.9. The optimal number of enrolled students concerning space, equipment, and number of teachers

Enrolment quotas before the beginning of each academic year are adopted by the Governing Board of the University, at the proposal of the Senate, and with the consent of the competent ministry. Students can study as full-time or part-time students. Full-time students are those who study according to the programme with a full teaching schedule. Full-time students pay their costs by themselves. Part-time students are students who attend the study programme in addition to work or other activities. The optimal number of enrolled students in terms of space, equipment and number is determined by the decision of the Senate of the University of Mostar and the Faculty of Law for each academic year.

3.10. Resources required to conduct the study programme

Teachers from the University and teachers from reference higher education institutions in academic ranks from the relevant scientific area, field, and branch participate in the implementation of the study programme. Data on the structure of teaching staff by rank and education, gender and age structure, scientific research productivity, mobility, and project activities of teaching staff are regularly monitored through the bodies from the quality assurance system. These data are processed at the level of the study programme and organizational unit, and are published in annual reports.

Physical resources required for the implementation of study programmes:

- classrooms
- system for E-LEARNING (SUMARUM)
- forensic/criminalistics cabinet
- Library (Faculty of Law, University Library)

Based on the signed cooperation agreements in the implementation of the study programme, the resources of other institutions are used.

3.11. Study programme quality assurance system

The purpose, goal, structure, operation and areas of evaluation of the quality assurance system of the University of Mostar are defined by the *Rulebook on the structure and operation of the quality assurance system of the University of Mostar*.

According to the *Rulebook*, the quality assurance system at the University of Mostar consists of permanent bodies of the quality assurance system at the university level: the Quality Assurance and Improvement Committee and the Quality Assurance and Improvement Office. The Faculty of Law is operated by the Quality Assurance and Improvement Committee, which consists of the Vice-Dean for Academic Affairs, the Quality Coordinator, the representative of the teaching staff, the student representative, and the representative of the administrative and technical staff. The Quality Coordinator of Faculty of Law is also a member of the Quality Assurance and Improvement Committee.

The *Rulebook* defines the competencies and activities of each body from the quality assurance system. Bodies from the quality assurance system carry out regular activities defined by the *University Quality Assurance Manual at the University of Mostar*, which relate to conducting surveys and monitoring and data processing. Based on the implemented activities, annual reports are prepared at the level of the study programme, organizational unit, and the University
